

LED luminaires for industry

ACTILED Lighting designs and manufactures, in France, standard and custom LED luminaires for professionals : manufacturers, architects, designers and installers.

In the industrial sector, ACTILED Lighting provides innovative solutions, particularly for lighting fixed or mobile workstations. In addition to its catalog products, ACTILED also develops customized solutions for machine lighting.

Workstation lighting

Mobile lighting

General lighting

Workstation lighting

High standards of quality and precision

- Color rendering index (CRI) over 80
- LED color temperature of 4000K or 5000K to provide natural lighting.
- Lighting¹ according to workstation requirements: from 400 to 2700 lux over the work area (luminaire positioned at a distance of one meter).
- Anti-glare lighting

The **ACTiLine4330P** is a linear LED luminaire particularly suited to lighting workstations and workbenches. Compact and powerful, it can be easily integrated into structures or furnishings by simple fastening. Optional integrated switch.

ACTiLine

The **ACTiLine4373P** is a high-power linear LED luminaire with integrated dimming. It offers a particularly efficient solution of light level by means of a push-button on the side.

¹ Standard EN 12464-1 "Lighting for indoor workplaces" is the reference for illuminance levels for different types of tasks.

² Available on some models.

The quality of lighting at a workstation is a factor in productivity and efficiency. It also has an impact on the health and well-being of the staff.

ACTiLED Lighting luminaires take into account all the important parameters to guarantee ergonomics, comfort and safety, and offer LED lighting solution suitable to every situation.

Ergonomy and integration

- Compact and robust
- Suitable fixing systems
- Integrated switch²
- Dimmable intensity control
- Direct connection to 230VAC main

Control and dimming

There are several possible solutions for switching the luminaire on and dimming it:

- Integrated or remote switch
- Integrated dimming.

ACTiTube

The **ACTiTube20M** is a tubular LED luminaire suitable for extra lighting. With a diameter of 20mm, it's particularly compact, swiveling and it can be positioned easily and discreetly where space is limited.

Mobile lighting

In some industries, such as aeronautics, railways and shipyards, assembly and cabling activities take place directly inside the structures.

For technical teams, it is therefore necessary to set up temporary lighting to illuminate a work area and move it as the work progresses.

ACTiTube

To meet these requirements, ACTiLED has developed LED tubulars optimized for mobile use. The 40mm diameter **ACTiTube40M** are compact, lightweight, robust and easy to connect/disconnect. They are also chainable, so you can easily install lighting for a large work area.

Compact | Lightweight | Robust | Chainable

The **ACTiTube20M**, with its 20mm diameter, is available in a portable version and offers a particularly light and compact solution.

Quick connectors

Easy to hang up

Example of ACTiTube40E battery-powered carts for optimum mobility.

Power supply adapted

Different types of power supply are available to suit the environment and resources available in the work area.

General lighting

ACTiTube

Compact | Lightweight | Robust | Chainable

Lighting requirements in industrial premises are extremely varied. Whether for workshops, laboratories, technical areas or corridors, ACTiLED offers luminaires to suit.

In particular, **ACTiTube40E** tubulars offer a highly versatile solution. They are sturdy, compact, waterproof, chainable, powered directly from 230VAC and very easy to install.

Detailed information is available in our “industrial lighting” online catalog and in the product data sheets on our website: <https://www.actiled.com/en/node/340>

Your partner for sustainable lighting.

We design our own LED sources, incorporating miniaturized, reliable power supplies. Our expertise in electronics, mechanics, photometry, control and dimming enables us to offer our customers innovative solutions optimized for their needs.
